- ✓ **DVR Edge Recording (Built-in Storage)**

Live Monitoring

Connect any number of your cameras, regardless of location. View online or in a mobile app.

All in one place

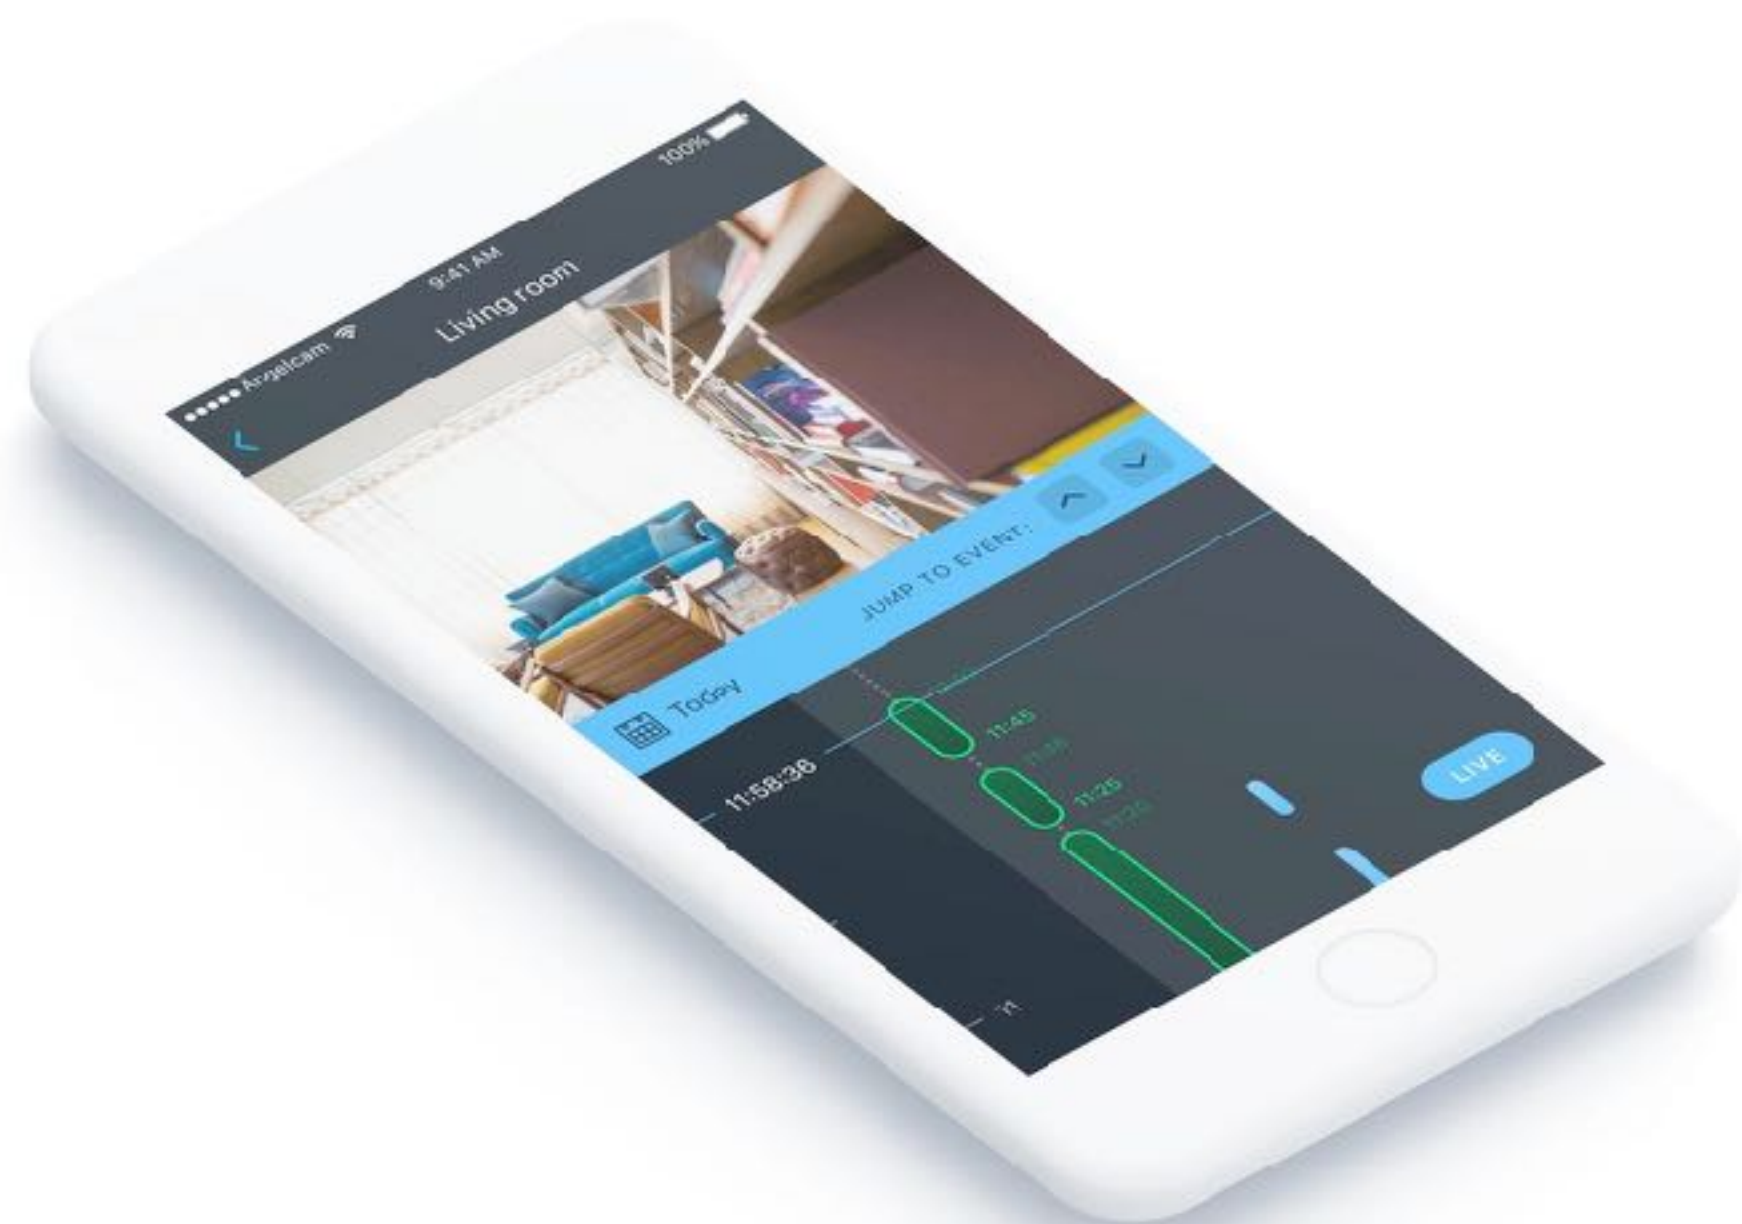

With one low monthly or project cost, connect cameras from multiple on-site locations. Cloud platform support 90% of camera brands both wireless with solar powered and wired.

Camera status notifications / alerts

Get an email notification in case your camera trigger any security events or goes offline for any reason.

Camera sharing

From stakeholders, contractors to public, share your camera streams easily.

Cloud Recording

Record & backup your camera to the Cloud. Up to 3 years of retention.

DVR & NVR alternative

Hardware is susceptible to damage and theft. Recordings in Cloud stay safe and encrypted.

Browse the interesting parts

Track motion or other events to know when things happen in video. IFTTT (if this, then that) is fully supported.

Download and share clips

Easily create and download short video clips. Share them with the relevant authorities, contractors and other stakeholders.

Timelapse

Easily create time-lapse videos from your recorded footage.

Broadcasting

Promote your projects by easily broadcasting your footage online.

Access you control

Take your broadcast public or keep it private with the option to set up password protection.

Promote your projects

Attract and update the public by adding your logo to the footage and watch over the data in analytics.

IFTTT ((if this, then that) support

Start or stop broadcasting based on time of the day or any other event.
